

M. DHAMOTHARAN

Full Stack Web Developer — MERN Stack Developer

+91-8072781252 | mddhamotharan281@gmail.com | GitHub | LinkedIn | Portfolio

Professional Summary

Full Stack Developer specializing in the MERN stack and AI-powered web applications, with expertise in building scalable, real-time SaaS platforms and modern web solutions. Skilled in developing responsive user interfaces with React.js and Next.js, and designing high-performance backend services with Node.js, Express.js, MongoDB, Redis, and event-driven architectures. Experienced in integrating Generative AI, LLMs, and Retrieval-Augmented Generation (RAG) into production applications. Strong foundation in data structures, system design, API development, database optimization, and cloud deployment, with a focus on performance, scalability, and user experience.

Technical Skills

- Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Responsive & Accessible UI Design
- Backend:** Node.js, Express.js, REST APIs, GraphQL, Socket.IO, JWT Authentication, Microservices
- Databases:** MongoDB, MySQL, Redis (Caching & Pub/Sub)
- Cloud & DevOps:** Docker, AWS, Apache Kafka, Git/GitHub, CI/CD fundamentals
- AI & Data:** Gemini AI, RAG (LangChain), Pandas, NumPy, Scikit-Learn

Professional Experience

Software Developer — HEPL, Tamil Nadu

Apr 2025 – Present

Enterprise Multi-Tenant Collaboration & No-Code SaaS Platform — Next.js, Node.js, MongoDB, Redis, Kafka, Socket.IO, React Native, RAG, AI

- Contributed to a multi-tenant SaaS platform enabling secure tenant isolation, workflow automation, and real-time collaboration across enterprise organizations.
- Built real-time chat, group messaging, broadcasts, screen sharing, and multilingual translation features using Socket.IO and Kafka.
- Developed collaboration modules including Wiki documentation, file sharing, shared notes, bookmarks, to-do lists, planners, polls, and approval workflows.
- Implemented event-driven backend services with Redis and Kafka to support scalable, low-latency communication and data synchronization.
- Contributed to the React Native application by developing chat, notifications, location sharing, and product-view functionalities.
- Integrated a RAG-based AI assistant that provides contextual answers about platform features, workflows, and organizational knowledge.

MERN Stack Developer Intern — HEPL, Tamil Nadu

Dec 2024 – Mar 2025

- Built full-stack web applications end-to-end using React.js, Node.js, Express.js, and MongoDB.
- Implemented secure authentication with JWT, refresh tokens, and Role-Based Access Control (RBAC).
- Optimized backend APIs and MongoDB queries, improving average response times for key endpoints.

Python Full Stack Developer Intern — Inmakes Info Tech, Tamil Nadu

Sep 2024 – Nov 2024

- Developed full-stack web application features using Django, React.js, HTML, CSS, and JavaScript.
- Contributed to e-commerce platform development, including product management, user authentication, and order processing functionalities.
- Designed and integrated RESTful APIs for seamless communication between frontend and backend systems.
- Worked with relational databases for data modeling, CRUD operations, and query optimization.

Projects

AI Incident Management Platform — Intelligent DevOps Monitoring & Resolution System

Next.js, Node.js, MongoDB, Redis, Kafka, Python, Gemini AI, RAG

- Built an AI-powered incident management platform that analyzes production failures, application logs, and system alerts to identify root causes and recommend remediation actions.
- Developed an intelligent incident triage workflow using LLMs and RAG, enabling DevOps teams to quickly diagnose outages and automatically generate actionable resolution suggestions.
- Implemented real-time event ingestion and processing pipelines using Kafka and Redis to monitor system health and detect critical service disruptions.

PawSign — AI-Powered Accessibility & Healthcare Booking Platform

MERN Stack, Python, MediaPipe, Computer Vision

- Designed an inclusive healthcare booking platform that enables speech-impaired users to schedule appointments through real-time hand-gesture recognition.
- Integrated MediaPipe-based computer vision models to translate gestures into structured application commands and user interactions.
- Implemented secure authentication, appointment scheduling, role-based access control (RBAC), and workflow management for multiple user roles.

Education

Master of Computer Applications (MCA) — Rajiv Gandhi College of Engineering & Technology, Puducherry 2022 – 2024

CGPA: 8.4 / 10

Bachelor of Computer Applications (BCA) — Achariya Arts & Science College, Puducherry 2019 – 2022

CGPA: 7.5 / 10

Certifications

- AWS Solutions Architecture Virtual Experience — Forage
- Deloitte Cyber Security Virtual Experience — Forage
- Google Cloud Platform Website Deployment
- Python Data Science Program — 360DigiTMG
- Java Full Stack Development — Greens Technology
